EDUCATION

Singapore Management University Aug 2022 - May 2026
BSc (Software Engineering)

- Relevant coursework:** Web Application Development, Enterprise Development, Cloud Solutions Architecture, Data Management, Advanced Programming & Design, Operating Systems, Networking, Data Security & Privacy, Cybersecurity Fundamentals, Cyber Threat Investigation
- Leadership:** AIESEC'24 Delegates & Logistics Director, ICON'23 Logistics Director, starringSMU'23 Programmes Director

PROFESSIONAL EXPERIENCE

Backend Software Engineer Intern May 2025 – Present
IDEMIA

- Engineered 3 core backend services using Java Spring Boot, WebSocket, and Apache Kafka to handle high volume real-time data streaming, reducing deployment time by 30% via Docker containerization
- Ensured service reliability by authoring 30+ unit tests (JUnit and Mockito), achieving 90%+ test coverage for all new features and maintaining strict alignment with security and functional specifications
- Contributed to issue analysis and resolution across test phases and production, demonstrating support for technical solutions and team collaboration

Fullstack Developer Intern May 2024 – Nov 2024
Radach & Family Organics

- Created over 20 mock ups and design concepts, converting into fully functional solutions with 100% cross-device compatibility and responsiveness, adhering to the principles of the SDLC lifecycle
- Conducted over 20-unit tests to ensure robust functionality of the 2 product line websites developed using the FERN (Firebase, ExpressJS, ReactJS, NodeJS) stack with Chakra UI and SendGrid, prior to their successful deployment on Hostinger
- Facilitated the acquisition of 150 new users viewing the website within 2 months of implementing site improvements on the newly deployed platform

Web Development Intern Sep 2021 – Feb 2022
A*STAR Experimental Drug Development Centre

- Developed an internal application using ASP.NET, C#, and MySQL, achieving a 15% efficiency enhancement for the department, involving self-directed learning of the new framework during development
- Streamlined the UAT process for a whole system feature, completing testing 2 weeks ahead of schedule, a success supported by the rapid acquisition of skills in this new development environment while building the application
- Partnered with a team of over 5 members to improve operational efficiency by implementing streamlined processes, effectively applying newly learned web application development knowledge to contribute to team goal

Mobile Application Developer Jun 2021 – Sep 2021
People's Association

- Led a 4-person team to deliver a new client-facing solution 2 weeks ahead of the 4-month deadline, resulting in a 95% client satisfaction rating on initial delivery and sign-off
- Developed a cross-platform mobile application (Ionic/AngularJS) serving over 50 internal beta testers and integrated Google Firebase for real time authentication and data synchronization
- Managed stakeholder requirements by conducting weekly sprint review meetings with 4 key clients, successfully translating ambiguous business needs into 25 confirmed functional system requirements

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript, TypeScript, Python, C++, PHP, HTML, CSS, Flutter Dart, SQL
- Frameworks:** Spring Boot, NodeJS, ExpressJS, ReactJS, NextJS, AngularJS, MongoDB, Firebase, CLI scripting, Chakra UI, Material UI, Framer Motion, Bootstrap, UI/UX, Vite, Ionic, RESTful API, WebSocket, Scrum Agile, Junit Testing, Mockito
- Tools:** Git, Jira, Docker, Figma, Apache Kafka, Apache JMeter, DBeaver, MSSQL Server, WinSCP, CloudFlare, Wireshark, Hostinger VPS, AWS
- Certifications:** ISC2 Certified In Cybersecurity, Cisco Cyber Threat Management, Cisco Ethical Hacker, Google IT Automation, Google Data Analytics
- Language:** English (Fluent), Chinese (Conversational), Bahasa Indonesia (Conversational), French (Basic)

SELECTED PROJECT EXPERIENCES

PokéRivals Aug 2024 – Nov 2024
Fullstack Developer

- Oversaw frontend and backend development and complex database design, was pivotal in delivering an engaging Pokémon battle tournament platform featuring a unique and functional betting system
- Built core features using NextJS, Spring Boot, and Stripe, enabling ELO-based tournaments and secure betting workflows
- Deployed on Vercel and AWS, ensuring maintainability, scalability, and security through CI/CD pipelines and adherence to SOLID principles

Ticket Blaster Feb 2024 – Apr 2024
Fullstack Developer

- Developed a fullstack ticketing platform using ReactJS and Vite for the frontend and backend microservices in Java, TypeScript, and Python for scalability
- Integrated backend APIs for Stripe payments and Courier notifications, containerized with Docker for consistent deployment across environments
- Managed end-to-end development, implementing microservices architecture to enhance resilience and streamline deployments
